

Witness the positive outcomes of MedX Laser and Light Therapies

TRY THE MedX LASER & LIGHT THERAPY TREATMENT SYSTEM RISK FREE AND WITHOUT OBLIGATION

EXPERIENCE THE HEALING NATURE OF LIGHT

MedX light technologies provide “a therapeutic physical modality, using photons (light energy) from the visible and infrared spectrum for tissue healing and pain reduction” as defined by the North American Association of Laser Therapy (NAALT). Also known as low level laser therapy (LLLT), cold or soft laser therapy, low energy laser therapy or laser therapy, the therapeutic light energy can be produced by either LED (light emitting diodes), SLD (superluminous diodes, or super bright LEDs), or low level laser diodes.

Mechanism of Action

Light energy penetrates through the skin and is absorbed by the mitochondria of cells of all types. Light energy is converted into biochemical energy, restoring normal cell function (similar to photosynthesis).

Effects of Laser and Light Therapy

- Increases Circulation and Angiogenesis
- Reduces or Eliminates Acute and Chronic Pain
- Reduces Inflammation and Swelling
- Stimulates and Improves Nerve Function
- Strengthens and Repairs Bone and Soft Tissue
- Increases Mobility and Muscle Function

Conditions Treated with Laser and Light Therapy

Based on the research and literature:

- Arthritis (*osteo and rheumatoid*)
- Carpal tunnel syndrome (repetitive strain injuries)
- Acute and chronic pain conditions (*post-operative, neuralgia, fibromyalgia or muscle tension/spasms*)
- Soft tissue injuries, strains and sprains
- Wounds (*post-operative, acute and chronic*)
- Swelling and edema
- Inflammatory conditions (*e.g. tendonitis, bursitis*)
- Bone fractures and orthopedic implants
- Addictions: smoking, alcohol, and drug abuse

MedX Advantages

- FDA, Canada cleared, and CE Mark equipment
- 10+ years of quality laser and light products
- Equipment and training cost at a fraction of the price of similar products
- Best customer service in the industry

LIGHT BELIEVERS...

"The MedX laser was my modality of choice during the 2008 Olympic Games. During the Olympics I enjoyed the portability of the MedX^{HOME} unit and probe. Both units are lightweight and were easily transported to the venue to treat the athletes. I have used the MedX laser to treat everything from stress fractures to low back pain. It was very useful in helping our Olympic Rowing team get to the games and win medals!"

Michael J. Murray, DC, FCCSS(C), FICC, Chiropractor for the 2008 Beijing Canadian Olympic Rowing Team

"My practice is at a point where it is unusual to turn someone away because I was not able to help. Now I have been able to heal conditions that I would have only improved marginally. As you can imagine, this has delighted each patient and now one success story leads to more referrals thus creating more success stories. The MedX laser has certainly helped me expand my practice.

Dr. James Wawrow, B.H.K., BSc., D.C., Global Wellness Chiropractic & Laser Centre, LaSalle, Ontario

"I have had the opportunity to use several low-level laser devices... I found the MedX unit to be an exceptional treatment modality. It goes without saying that I would gladly recommend the MedX (unit) to any of my colleagues and their patients looking to add an effective tool to the treatment of their conditions."

*Ted L. Forcum, DC, DACBSP, FICC, CSCS
2005 ACA Sports Chiropractor of the Year
2005 US Figure Skating National Championships Medical Director
US Olympic Training Center Staff Chiropractor
PGA Tour and Senior/Champions PGA Tour Staff Chiropractor
US Olympic Track & Field Trial Chiropractic Coordinator
Winter Olympic Games, Salt Lake City for FICS, USSCF and WOA*

"I have some old injuries from my days playing in the NHL. After using MedX Phototherapy on a herniated disc, the pain I was experiencing in my legs has disappeared. I am able to participate in charity hockey and other sporting event without worry..."

Doug Gilmour #93, NHL Legend

"I had the MedX unit for about a two week trial basis. I treated a variety of patients ... I saw such a significant change in my patients in such a short time that I had to purchase the system immediately so I could continue to use the unit without interrupting the treatment protocol."

Douglas Scott, Chiropractic Physician, North Anderson Chiropractic

"Thank you for introducing NY Hand to the MedX Phototherapy system. We have had such great success ... that I have just purchased a second system. With a minimal amount of time, we are able to reduce pain and get substantial increases in range of motion. Our patients as well as our prescribing physicians are increasingly requesting (MedX) phototherapy."

Wendy R. Burnett, OTR, CHT NY Hand Rehabilitation

"We looked at every other Laser system out there to purchase and decided on the MedX because of its capabilities, value, marketing structure and great customer service. I have to tell you we are so excited with the results we are seeing in our patients... Every practitioner and medical equipment distributor needs to know about this system; it's awesome!"

Angela Uhl, co-owner of New Loudon Chiropractic & Rehabilitation, Latham, NY

.... After only (2) days of treatment (with the MedX Phototherapy System), the swelling around my foot and ankle decreased significantly. After (4) days, the wounds were closing in and the redness and drainage were gone. I have been using the MedX Laser for almost (5) weeks now. My foot has healed more in the past (5) weeks, then it did in the previous 2 1/2 years. I am very pleased with the healing that has taken place and highly recommend this treatment.

Ken B. (patient) from North Carolina

"We are very excited that our facilities in the state of Ohio will be the first to offer MedX phototherapy to our patients. This partnership with MedX Health will give Extendicare clinics effective healing alternatives and a competitive advantage over other regional care facilities. Adding MedX Phototherapy to our OHIO facilities has proven to be an effective method to treat a variety of patients."

Phil Small, COO, Extendicare Health Services, Inc.
